# Features

The Tiger Bengal series boom mower can be attached to a wide variety of wheel loaders. The wheel loader must have a minimum GVW of 25,000 lbs or a Lift Capacity of 10,000 lbs. Available with Left side or Right side operation, the boom unit features a totally independent auxiliary engine capable of delivering all the cutting power, needed for your toughest jobs. This unit is built and designed to allow the operator to achieve maximum performance in all types of vegetation.

Simply add the mating half of the loader's Quik-Attach system and easily go from bucket work to a boom mower in minutes.

**Available in Left Side or Right Side models.**
